The comments of the primary and secondary auditors will be sent to all members of the relevant subcommittee. Each subcommittee will meet and take into account all reviews. The hard shoes of the approved proposals will be requested and signed the same day. A report will be sent to the applicant within 24 hours to give the applicant the opportunity to respond and/or review their application if the proposal requires revision. The applicant will then have about three days to recourse to the President of the Subcommittee, before the deadlines HREC and AREC. However, the approval of the subcommittees is at the discretion of the subcommittee chairmen and exceptional or important questions may be held at the next subcommittee meeting. Application deadlines for 2022 are listed here on scientific and ethical reviews. Andruween Kadalie needs subcommittees. Note also: IRC committees do not normally examine subsidy applications unless a full review protocol is sent. The protocols which are the result of successful subsidy awards following the C1 process and which have already undergone a scientific review will be reviewed by the IRC only if substantial changes have occurred to the design of the study. The mechanisms are in place to manage urgent applications. Please advise Keren Middelkoop or Jo-Anne Passmore, Å and Joy Joachim Research Management Accountant in advance of an impending deadline in case of advance, so that you can take the necessary steps to speed up the approval process. Referring amended proposals for AERC requires the chairman of the Scientific Committee foron animals and signatures of the IDM Director. An additional column has been added to adapt to the expiry dates for required signatures. Eligibility criteria for IRC accelerated review: Protocol submitted outside the submission-review cycle for which there is reasonable confidence that UCTHREC will also offer expedited review. 'Reasonable confidence' would in almost all instances need the investigator to approach the UCTHREC Chair for confirmation. Protocol involving minimal complexity, for example: establishment of biobanks or databases; some laboratory studies using previously stored samples. IDM/UCT involvement is a minor component of an external study, for example: laboratory analysis of non-endpoint assays for samples collected at non-UCT sites. Protocol is a sub-study of a previously IRC and UCTHREC reviewed and approved protocol that is carried out in the same study population with expansion of the same aims and interventions. FURTHER DETAILS of the Faculty Human and Animal Research Ethics Committees are found here: www.health.uct.ac.za/hrs/research/humanethics/about www.health.uct.ac.za/hrs/research/animalethics/members ITMAT symposia enlist outstanding speakers from the US and abroad to address topics of direct relevance to translational science.Å Å Read more Seminars Launched in September of 2005, the ITMAT monthly seminar series continues to host outstanding role models who pursue translational research, from outside of the Penn community, are invited to lecture in this series, which is being coordinated by Charles Abrams, M.D. Read more Workshops Workshops are conducted throughout the year and focus on key functional areas within ITMAT. These workshops have been coordinated by the leaders of our research programs and cores and address the practicalities of technologies and approaches of relevance to Translational Medicine and Therapeutics.
